

SD Cancer Coalition 2016: Year in Review

The South Dakota Comprehensive Cancer Control Program (SD CCCP) began in 2005 with the goal of reducing the burden of cancer and promoting access to cancer prevention and treatment services throughout the state. Through the SD Cancer Coalition, the SD CCCP brings together diverse organizations and individuals to monitor and assess cancer related issues in the state. The SD CCCP determines priority areas of focus on an annual basis and mobilizes resources that can impact outcomes. In this report, Coalition activities and outcomes are highlighted to review the progress made in 2016 towards achieving the goals and priorities of the SD Comprehensive Cancer Control State Plan 2015-2020.

Goals of the SD Comprehensive Cancer Control State Plan 2015-2020

- Prevent cancer among South Dakotans
- Detect cancer in the earliest stages for all South Dakotans
- Ensure timely and appropriate access and treatment for all cancer patients in SD
- Optimize South Dakotans' quality of life across the continuum of cancer
- Eliminate disparities in the burden of cancer in SD

“Reducing the burden of cancer in South Dakota will take dedication and collaboration, but working together we can decrease the impact this devastating disease has on all South Dakotans.”

*- Kim Malsam-Rysdon,
Secretary of Health*

2016-2017 SD CCCP Organizational Structure

Coalition By Numbers

South Dakota Cancer Coalition

More than **40**
professionals attended the
2016 Fall Cancer Coalition
Meeting

4 Task forces

3 Cross-cutting
Committees

2016 Highlights

South Dakota Cancer Coalition

South Dakota was

1 of only 6

states funded through a new cooperative agreement from the Centers for Disease Control and Prevention (CDC), titled *"Increasing the Implementation of Evidence-Based Cancer Survivorship Interventions to Increase Quality and Duration of Life among Cancer Patients"*.

More than

41,500

client reminders distributed for HPV vaccination

The 2015-2020

State Cancer Plan

contains **15** priorities

4

model policies developed including:

- Worksite UV Protection
- Tobacco-free Healthcare Systems
- Cancer Screening
- HPV Immunization

In collaboration with partners, the SD Cancer Coalition supported

10

educational webinars including topics in palliative care, a 6-part HPV vaccine series, and 3 webinars on FluFIT implementation

South Dakota was

1 of 11

states selected to participate in the Comprehensive Cancer Control National Partnership HPV Workshop

Program Grant Update

Increasing the Implementation of Evidence-Based Cancer Survivorship Interventions to Increase Quality and Duration of Life among Cancer Patients

Through a 3-year cooperative agreement with the Centers for Disease Control and Prevention, the SD Department of Health established the South Dakota Survivorship Program (SDSP) in September of 2015. The SDSP aims to address the public health needs of cancer survivors in the state, to increase duration and quality of life. At the close of the first year of implementation, five cancer centers are partners, a navigator network exists, surveillance data collection is underway, and formalized survivorship care plan (SCP) policies are established in all five cancer centers.

The first year of the SDSP focused on establishing partnerships, infrastructure, and system changes within the partner cancer treatment centers. Program years two and three will focus on further implementation of the specified interventions, including continued development of the expanded patient navigation services and SCP provision, measuring the impact of prevention efforts through surveillance surveys and patient feedback, expanding coordination with primary care providers, and offering education to healthcare providers through training programs and dissemination of program findings.

The SDSP released a white paper in Fall 2016 entitled, *Implementation of Survivorship Care Plans at Three Health System-Based Cancer Centers in a Rural State*. The paper described the development and implementation of cancer SCPs at three health systems' cancer centers. Insights from each health system can be used to support adoption of SCPs in similar low-population states and regions. The paper provides an understanding and a framework of the processes, successes, and challenges involved in the development and implementation of SCPs throughout each stage in the spectrum.

Supported Projects

Implementation Grant Funding Awarded, 2015-2017

Implementation grants are awarded to implement evidence-based activities that lead to policy, system or environmental changes. From 2015-2017, implementation grant funding totaled approximately \$88,500 through funds provided directly by the SD CCCP and partnerships with other SD Department of Health Programs.

HPV Vaccination

Sanford Health was awarded a grant in July 2015 to develop and implement three evidence-based interventions within seven primary care sites in the state. The interventions included client reminders, provider assessment and feedback, and community-based interventions implemented in combination. After one year of implementation, more than 40,000 client reminders were distributed. Rates of zero dose HPV vaccination in adolescents decreased 12.8% across the 7 sites, as well as a 6.6% increase in 3-dose series completion. An estimated 7,000 doses of HPV vaccine were administered in the first year of the project. Sanford Health has been awarded a second year of funding to expand implementation to 29 Sanford SD clinic sites.

Worksite UV Protection

Rapid City Aquatics Center and the City of Huron were awarded funding to implement a UV Protection Policy for employees who work outdoors. On-site assessment and policy implementation were a required component of the funding. SD CCCP contract staff provided support through monthly technical assistance, educational sessions and small media. Each site also selected sun protection equipment to offer employees (e.g., sunscreen, hats), purchased with the grant funding. Knowledge, attitude and behavior of employees was assessed pre- and post-project implementation. Both sites implemented policy within the project period, and analysis of survey results is underway.

Breast and Cervical Cancer Screening

In July 2016, Horizon Health Care Inc. and Platte Medical Center were awarded funding to implement evidence-based interventions to increase breast and cervical cancer screening. Both healthcare organizations have implemented client reminders and are providing quarterly progress reports, which are used to track progress and examine the impact of these efforts on overall screening rates. In December 2016, DakotaCare was awarded funding to implement client reminders for breast and cervical cancer screening and mobile mammography to women living within twelve Hutterite colonies in SD. The implementation period for this project is Jan-Dec 2017.

Newsworthy

In partnership with the University of South Dakota Contemporary Media and Journalism Lab, the Clinical Trials task force developed ten brief videos on clinical trial awareness. The videos were developed using the identified messaging from surveys commissioned by the group to increase clinical trial awareness and participation in SD. The complete video series can be found on the SD Cancer Coalition Website, www.cancersd.com.

The Breast Cancer Screening task force developed a brief video for healthcare providers **promoting risk-based screening for breast cancer**, along with a supplementary infographic (shown at left). With changing guidelines, the group addressed the confusion with creation of a targeted campaign to remind providers to have the conversation about risk-appropriate screening guidelines in order to increase the number of women that get screened. The infographic and video can be viewed at www.getscreenedsd.org.

In January 2016, President Obama announced the Cancer Moonshot Initiative. The goal of this initiative is to double the rate of progress and make a decade's worth of advances in five years, as stated by the head of the Cancer Moonshot task force, Vice President Biden. The complete Blue Ribbon Panel Report may be viewed at cancer.gov/brp.

Cancer Coalition Awards 2016

Recognition awards were once again presented at the SD Cancer Coalition 2016 Fall Meeting, held on September 20th in Mitchell, SD. The Impact Award recognizes an organization that has successfully achieved evidence-based and measurable impact on projects consistent with priorities of the SD Cancer Plan. The Champion Award recognizes a coalition member that goes above and beyond the call of duty to advance projects consistent with priorities of the SD Cancer Plan.

(Pictured: Lexi Pugsley, SD CCCP Coordinator; Tracy Bieber, Sanford Health, and Dr. Mary Milroy, SD Cancer Coalition Chair)

Sanford Health ***2016 Impact Award***

Sanford Health received the 2016 SD Cancer Coalition Impact Award. Sanford Health Care, Inc. received an implementation grant from the SD CCCP and has ***made great strides in reducing the burden of HPV associated cancer*** in SD by increasing HPV vaccination rates. Some of their successes over the past year at the seven primary care clinics participating in the project include: disseminating over 41,500 client reminders for HPV vaccination, administering nearly 7,000 doses of HPV vaccine, decreasing the percentage of adolescents ages 11-26 with zero doses of HPV vaccine by 12.8%, and increasing adolescents who've completed the series by 6.6%.

Tracy Bieber, RN, BSN ***2016 Champion Award***

Tracy Bieber, member of the HPV task force, received the 2016 SD Cancer Coalition Champion Award. Tracy is an active member of the HPV task force, leads the Sanford HPV implementation grant, is the Sioux Falls Immunization Coalition Chair, attended the national HPV workshop as part of the SD team and assisted in the development of the HPV model policy. Tracy was commended in the nomination letter recognizing that she “not only was instrumental in leading change in her organization, but has also worked to ***improve the health and wellness of the community*** through her leadership with the Sioux Falls Immunization Coalition.”

Want to get **INVOLVED?**

The mission of the **SD Cancer Coalition** is to reduce the burden of cancer for South Dakotans. We are looking for enthusiastic and dedicated volunteers to join the coalition! **HERE'S HOW!**

Register Online: To learn more about this opportunity, please join online at http://www.cancersd.com/join_us.htm

Join a Task force or Committee: Join a priority task force or a committee of our coalition! Each task force identifies activities to accomplish each year which **address specific issues in cancer prevention and control** from the SD Cancer Plan.

Engage Your Organization: The 2015-2020 State Cancer Plan contains a blueprint for strategic action and statewide partner involvement. Engage your organization in one of the **15 plan priorities.**
