

HEALTHCARE REFERRALS TO CHRONIC DISEASE PROGRAMS IN SOUTH DAKOTA

DID YOU KNOW?

Evidence-based programs are available in South Dakota to help you meet quality measures.

CHRONIC CONDITIONS

HEART DISEASE

DIABETES

CHRONIC LUNG DISEASE

STROKE

ALZHEIMER'S DISEASE

CANCER

CHRONIC KIDNEY DISEASE

MENTAL HEALTH

CHRONIC PAIN

Chronic conditions are the leading causes of death and disability in the United States. They are also leading drivers of the nation's **\$3.3 trillion** in annual health care costs.

\$3.3
TRILLION

MOST CHRONIC CONDITIONS ARE CAUSED BY A SHORT LIST OF RISK BEHAVIORS

Tobacco use and exposure to secondhand smoke

Poor nutrition, including diets low in fruits and vegetables and high in sodium and saturated fats

Lack of physical activity

Excessive alcohol use

Patients are **more likely to participate** in a chronic disease program when their **healthcare team recommends it**.

The healthcare team is vital in preventing and controlling chronic diseases. In South Dakota that includes:

- Referring tobacco-using patients to the SD QuitLine
- Providing general health related information to patients
- Ensuring screenings for various chronic diseases takes place
- Using health information technology to ensure overall quality of care
- Linking patients to other community health and education resources
